IV. Risk management capabilities

(I) Company category

The Company was incorporated in Shanghai in September 2004 as per approval of the former CIRC. In 2023, its written premiums amounted to 1.985bn yuan, and as of the end of 2023, total assets stood at 7.412bn yuan, with 3 provincial-level branch offices. According to Article 6 of Solvency Regulatory Standards of Insurance Companies No. 12: Solvency-aligned Risk Management Requirement and Assessment,

it is a Category II insurance company.

(II) The latest result of Solvency Aligned Risk Management Requirements and Assessment (SARMRA) of the Company

The Company scored 76.69 points in the last on-site SARMRA assessment. As per Solvency Regulatory Standards of Insurance Companies No. 12: Solvency-aligned Risk Management Requirement and Assessment of Solvency Regulatory Standards of Insurance Companies (II) (CBIRC Document [2021] No. 51), the final score of the Company was 75.88 points.

(III) Measures taken to improve solvency risk management and the latest status

The Company scored 76.69 points in the last on-site SARMRA assessment. As per Solvency Regulatory Standards of Insurance Companies No. 12: Solvency-aligned Risk Management Requirement and Assessment of Solvency Regulatory Standards of Insurance Companies (II) (CBIRC Document [2021] No. 51), the final score of the Company was 75.88 points. During the reporting period, the Company took further steps to enhance risk management. To be specific:

In respect of insurance risk, the Company further improved its insurance risk management system, formulated and issued Guidelines on Development, Design and Management of Agricultural Insurance Products, revised Regulations on Insurance Risk Management, Regulations on Management of Major Claims, and Rules on Quality Inspection of Claim Cases, with strict implementation; completed a rates review and analysis report on products in sale in the previous three years, with recommendations on ways to improve the loss-making business; issued its first business quality analysis report on high-claims insurance products and put forward recommendations to optimise their business quality; continued to conduct retrospective management of reserves, and completed retrospective assessment and analysis of the reserves of the Company in the previous two years, to ensure that the

reserves of the Company were adequate and reasonable; carried out claims investigation and handling for sudden frost damage at the end of the year, ensured reporting and acceptance of claims cases in a timely manner for an accurate estimate of related losses; reviewed reinsurance business in 2023, and formulated the plan for reinsurance in 2024.

For market risk, we amended and released Regulations on Market Risk Management, to optimise relevant management mechanisms; carried out drills of emergency response in insurance asset management to enhance relevant abilities; maintained communication with investment managers on market risk management to prevent adverse impact on the Company's net profit and net assets as a result of concentrated market risk exposure; carried out quantitative assessment of asset-liability management and quarterly analyses, in which we measured and analysed the impact on the return of the assets held due to market fluctuations, monitored the Company's cost-benefit ratio, and made forecasts on key indicators to achieve the goals, both external and internal, of asset-liability management.

As for credit risk, the Company revised Regulations on Credit Risk Management to improve relevant risk control mechanisms; improved response to risk incidents and activated contingency plans; supervised its branches in collecting year-end receivables, especially those important and difficult cases; conducted training on the Receivables Data Dashboard to promote its use; paid continuous attention to credit risk ratings of reinsurers and strengthened the analysis and assessment of the credit risk status of reinsurance brokers and reinsurers.

On the side of operational risk, the Company strengthened the management system, revised rules such as Regulations on Operational Risk, Regulations on Statistical Management, etc., and drafted an annual report on rules and policies for operational risk management; organised its subsidiaries to conduct quarterly analysis and inspection of their anti-fraud work and prepare quarterly fraud risk analysis reports; completed a quarterly anti-money laundering self-examination and implemented

timely rectification for issues identified; updated IT outsourcing contract templates, and strengthened daily management of outsourced personnel to improve IT outsourcing risk control; launched education and publicity programmes of laws and regulations to better prevent and control business risks, and resolve conflicts and disputes.

As for liquidity risk, the Company amended and issued Regulations on Liquidity Risk Management to enhance capabilities in management of the risk; continued to optimise cash flow projection modelling, enhanced retrospective review of net cash flows from operating activities, conducted review of cash flow budgets and analysed causes for adverse variance; evaluated the impact of future claims pay-out on cash flows in a timely manner, so as to ensure sufficient liquidity and stable cash flows; continued to communicate with CPIC AMC to ensure an asset allocation compatible with needs for cash flows; reviewed and optimised the risk matrix of investment liquidity, continuously monitored and assessed market liquidity and interest rate movements and their impact on liquidation of its investment assets; advanced system development for management of fiscal subsidies and initiated the linkage with its counter-part of the finance bureau; pushed for collection of major receivables in inward reinsurance business, and submitted application for recoveries of adjusted variable fee and profit commission on non-marine treaties from previous years.

In terms of reputational risk, we continued to improve the risk control mechanisms, and revised and issued Regulations on Reputational Risk Management; and participated in the annual training held by CPIC Group on reputational risk management, strengthened the foundation of reputational risk management and enhanced collaboration in media crisis management.

For strategic risk, we evaluated execution status of the quarterly development plan to promote the implementation of overall strategies and the realisation of our development goals.

(IV) Status of SARMRA self-assessment

In Q4, the Company completed its 2023 SARMRA self-assessment. The assessment was carried out as per the Solvency Regulatory Standards of Insurance Companies No. 12: Solvency-aligned Risk Management Requirement and Assessment of Solvency Regulatory Standards of Insurance Companies (II) (CBIRC Document [2021] No. 51), with scoring in system soundness (50%) and compliance effectiveness (50%). The Risk Management Department of the Company led the assessment and was joined by lead departments for each major risk category. Relevant departments provided required information according to their corresponding responsibilities. Such information was prudently assessed by the lead departments for major risk categories and then reviewed by the Risk Management Department. The Risk and Compliance Management Working Committee reviewed and confirmed the final result.

The Company scored 92.30 points in the SARMRA self-assessment of 2023, slightly higher than that of 2022, pointing to sustained improvement in its risk management capabilities. In 2023, the Company deepened its "integrated risk control". Firstly, we strengthened the risk appetite transmission mechanism, and further integrated risk appetite into business and management processes to ensure multi-dimensional, targeted risk monitoring. Secondly, we revised risk management policies and improved the risk control system; launched the on-line SARMRA system, optimised digital and intelligent tools, strengthened risk monitoring and early warning; built a risk control and compliance culture, and carried out dedicated training. Thirdly, we carried out an in-depth risk assessment of branch offices to accurately delineate their risk status and development momentum. In the future, we will strengthen credit risk monitoring and early warning, enhance credit risk response and mitigation; pay attention to cost control and strengthen business quality management; enhance liquidity risk management and control, and improve net cash flow forecasting and monitoring.

V. Integrated risk rating (differentiated supervision)

(I) The last two IRR results

The Company was rated AAA at the IRR (differentiated supervision) by NAFR (formerly CBIRC) for both Q2 and Q3 of 2023.

As per Solvency Regulatory Standards No.11: Integrated Risk Rating (differentiated supervision) of Solvency Regulatory Standards of Insurance Companies (II) (CBIRC [2021] No. 51), the IRR(differentiated supervision) results will be in 4 categories, i.e., A, B, C, D, which can be further classified into AAA, AA, A, BBB, BB, and B, both by ascending order of risks.

(II) Measures taken or to be taken for improvement

The Company's integrated risk rating (IRR) for the last quarter was AAA.

In the fourth quarter, according to regulatory feed-back on IRR of Q3 2023, the Company maintained a solid status in quantifiable risks, and a stable status in unquantifiable risks such as reputational risk, operational risk and strategic risk. The senior management took this seriously, convened meetings to communicate the results, made plans for remedial actions, and enhanced monitoring of metrics so as to be more pro-active in risk management.

(III) Findings of self-assessment of operational, strategic, reputation and liquidity risks

1. Operational risk

1.1 Operational risk status

In this quarter, first, the Company formulated rectification plans for various defects newly discovered in audits, carried out rectification with regular progress follow-up, urged relevant parties to complete rectification on time according to the plan; second, conducted a full review of existing rules and polices and made plans for amendments, abolition or drafting of new regulations, and followed up on its

implementation; updated the annual list of regulations on internal control; third, conducted annual training on legal affairs, disseminating knowledge on the protection of personal information and consumer rights, so as to effectively enhance employee awareness on risk control and compliance; fourth, revised rules such as Regulations on Accounting Files Management and Regulations on Recruitment Management, implemented them strictly to maintain effective control of operational risks; fifth, IRR results of Q3 2023 indicated a stable overall status. The Company will follow up on relevant metrics of the operational risk and brief the management regularly on the progress of rectification.

1.2 Methods of operational risk assessment

Conducted self-review by business lines and reporting of emergencies of major operational risk as per Solvency Regulatory Standards of Insurance Companies No.11.

1.3 Process of operational risk assessment

In this quarter, first, the Company conducted an assessment of IRR operational risk status, organised the screening by relevant departments of operational risk in mis-selling, fraudulent claims, mis-handling in investment, erroneous financial information disclosure, money laundering, information security and system failures, with follow-up rectification and ad hoc meetings to boost implementation. Second, it monitored key indicators of operational risk in tandem with risk upper limits, management reports on operational risk and rectification of gaps, with clear ownership by departments or branch offices, and may conduct self-review if circumstances require.

1.4 Results of operational risk assessment

The review indicated no serious flaws in operational risk.

2.Strategic risk

2.1 Status of strategic risk

The strategic risk facing the Company mainly includes the following:

First is potential risks arising from concentration of business in Shanghai. Second is the potential strategic risk arising from differentiated business strategies for agricultural insurance of CPIC P/C.

2.2 Methods of strategic risk assessment

Evaluation of market environment of industry strategic risk, the risk in strategic planning of the Company and the risk in implementation of its strategic planning, as per Solvency Regulatory Standards of Insurance Companies No.11.

2.3 Process of strategic risk assessment

Collected and analysed information on a regular basis, enhanced oversight of implementation status of plans made at the year beginning, and communicated the gaps to company middle and senior management.

2.4 Results of strategic risk assessment

Business development of the Company in the past 3 years has been volatile, which calls for intensified effort in market development and product innovation, particularly in areas other than Shanghai. At the same time, we will enhance performance evaluation against KPIs and take multiple measures to ensure healthy, steady premium growth and high-quality development.

3.Reputational risk

3.1 Status of reputational risk

In the reporting quarter, the Company conducted screening of its reputational risk, which showed that the risk was under control, and there was no major risk in media publicity.

3.2 Methods of reputation risk assessment

As per Solvency Regulatory Standards of Insurance Companies No.11, firstly, we monitored online media through the Group's monitoring platform; secondly, our spokesperson and brand specialists joined the Group's brand management team so that they can share and handle media information in a timely manner; thirdly, the Company issued the "Risk Early-warning" weekly reports to senior management and part-time reputational risk management staff to promptly identify and prevent potential risks. We also conducted a company-wide screening of potential reputational risks, further enhanced reputational risk management capabilities, continued to promote the establishment of a closed-loop entire-process reputational management system, so as to create a favourable environment for the Company's sustainable, healthy and stable development.

3.3 Process of reputational risk assessment

Filed sensitive words with the Group. Used Group platform for collection and statistical analysis of media reports containing such sensitive words, which would enable early responses or mitigation measures.

3.4 Results of reputational risk assessment

During the reporting period, adverse media publicity of the Company stayed under control, and there were no incidents which may trigger reputational risk.

4. Liquidity risk

4.1 Status of liquidity risk

The Company derives liquidity mainly from cash received from premiums, net investment income, sales or maturity of investment assets and financing activities. Demand for liquidity mainly stems from cash needed for payment of claims, daily expenditures and dividends distributed to shareholders.

As a specialised agricultural insurance firm, it mainly faces two types of liquidity risk.

First is the time lag in settlement of agricultural insurance premium receivables

by governments. The Company's main business is agricultural insurance, which accounted for 67% of total premiums, and of this, fiscal subsidies represented about 37% of agricultural insurance premiums. As per Provisions on Fiscal Subsidies of Agricultural Insurance Premiums of Shanghai Municipal Government, the subsidy would be accrued in advance and settled in the next year. Thus, the time lag may impact the Company's cash flows. To address this, it vigorously conducted communications with government agencies in charge of agriculture and finance at various levels, seeking to optimise the process of fiscal subsidy transfers so that it could receive the fund at an early date.

Second is agricultural insurance catastrophe risks. The agricultural insurance business of the Company is concentrated in the Yangtze River Delta, and given this geographical concentration and the characteristics of the business line, the occurrence of natural catastrophes could lead to huge outflows of cash for claims payments within a short period of time. In response, the Company put in place mechanisms to closely monitor likelihood of disasters, issue early warning and prepare for relief and damage-reduction effort; in the event of natural catastrophes, the Company will initiate the contingency plan, conduct claims investigation in a timely manner, coordinate funds planning to ensure normal and stable cash flows.

Moreover, the Company continued communication with CPIC AMC to ensure an asset allocation compatible with the needs for matching of cash flows; conducted repurchase via securities market and inter-bank market to satisfy short-term needs for liquidity arising from business development.

As at the end of Q4, LCR under the base scenario (LCR1) for the next 12 months and LCR under the stress scenario (LCR2) for the next 12 months were both above 100%, indicating a sound status in liquidity risk.

4.2 Methods of liquidity risk assessment

Conducted calculation of liquidity coverage ratios, retrospective adverse

deviation ratios of net cash flows from operating activities, net cash flows and stress testing of cash flows of the Company as per Solvency Regulatory Standards No. 13.

4.3 Process for liquidity risk assessment

On a quarterly basis, the Finance Department formulates comprehensive budgets for operating and investment activities in light of the strategic and business plans of the Company, projects cash flows on a rolling basis to evaluate the impact on its liquidity.

4.4 Results of liquidity risk assessment

The assessment indicated that all regulatory indicators of liquidity risk and cash flow stress testing pointed to sufficient liquidity to meet needs of the Company.

VI. Management analysis and discussions

(I) Change to solvency and reasons

As of the end of the quarter, the comprehensive and core solvency margin ratios of the Company was 376.28% and 341.20% respectively, maintaining a strong position, though down by 19.6pt and 17.3pt respectively from the preceding quarter.

Of this, actual capital was 3.128bn yuan, an increase of 8mn yuan from the previous quarter, mainly due to net profits of the quarter of 23mn yuan, an decrease of 20mn yuan in agricultural insurance reserve for catastrophes, an increase of 13mn yuan in other comprehensive income and an increase of 8mn yuan in non-admitted assets.

Minimum capital was 831mn yuan, increasing by 43mn yuan from the preceding quarter. Of this, minimum capital for insurance risk rose by 58mn yuan, as a result of business growth which increased minimum capital requirement for premium and reserve risk and catastrophe risk; minimum capital for market risk

rose by 37mn yuan, due to increase in minimum capital for interest rate risk; that for credit risk fell by 40mn yuan, mainly due to decrease in premium receivables, which led to lower minimum capital requirement for counter-party default risk; risk diversification effect increased by 8mn yuan.

(II) Change to liquidity risk indicators and reasons

As of the end of the reporting quarter, cash and cash equivalents was 74.6161mn yuan, up by 40.2465mn yuan from 34.3695mn yuan in the previous quarter. The increase was mainly due to increased cash inflow from financial assets sold under repurchase during the quarter.

LCRs of the next 3 months and next 12 months under base scenarios (LCR1) were 100.05% and 103.16%, respectively.

LCR2s, or LCRs of the next 3 months and next 12 months under stress scenario (mandatory) were 161.49% and 111.21%, respectively.

LCR2s of next 3 months and next 12 months under stress scenarios (self-testing) were 147.55% and 117.05%, respectively.

LCR3s, or LCRs of the next 3 months and next 12 months under stress scenarios before asset disposal (mandatory) were 87.11% and 89.89%, respectively.

LCR3s of the next 3 months and next 12 months under stress scenarios before asset disposal (self-testing) were 82.04% and 100.18%, respectively.

The retrospective adverse deviation ratios of net cash flow from operating activities of the reporting and the previous quarters were 65.56% and -54.03%, respectively, mainly due to lower-than-estimated amounts of claims pay-out under primary insurance contracts during the reporting quarter.

Net cash flow YTD was 15.3030mn yuan. That for the previous fiscal year was -19.8750mn yuan, and that for the year earlier was 30.4126mn yuan.

(III) Change to IRR and reasons

The Company was rated AAA at the IRR (differentiated supervision) by National Financial Regulation Administration (former CBIRC) for both Q2 and Q3 of 2023.

As per Solvency Regulatory Standards No.11: Integrated Risk Rating (differentiated supervision) of Solvency Regulatory Standards of Insurance Companies (II) (CBIRC [2021] No. 51), starting from Q1 2022, the IRR results will be in 4 categories, i.e., A, B, C, D, which can be further classified into AAA, AA, A, BBB, BB, and B, both by ascending order of risks.
